WITH THE PERFORMANCE POWER OF NVIDIA RTX

NVIDIA RTX BENEFITS FOR M&E:

- NVIDIA RTX GPUs are designed for demanding M&E workflows
- Larger GPU memory capacity enables more complex and realistic scenes or effects
- NVLink allows performance scaling and GPU memory pooling for realizing more complex production workflows
- CUDA, Tensor, and RT Core counts support simulation, new AI-enhanced features to automate routine tasks, and real-time ray tracing with AI denoising and DLSS
- Hardware Sync for rendering clusters and on-air or live events, Mosaic for multi-panel display walls, and warp and blend are requirements for virtual sets and cinematic quality GPU rendering
